DETAILED ACTION

Rejections Withdrawn

1. Claims 1-9 rejected under 35 USC 102(b) as being anticipated by Lloyd in view of the amendment filed on February 22, 2005.
2. Claims 1 and 8 rejected under 35 USC 102(b) as being anticipated by Bell in view of the amendment.
3. Claims 1 and 8 rejected under 35 USC 102(b) as being anticipated by Tritsch in view of the amendment.

Response to Arguments

4. Applicant's arguments with respect to claims 1-7 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1- 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Steer (4890608).

Art Unit: 1772

Steer relates to a disposable medical article comprising a backing (10) having a bottom surface, a plurality of single-use first skin-compatible adhesive layers (32) disposed onto said bottom surface and said adhesive layer having a lower surface facing away from the bottom surface, and a plurality of protective covers are releasably attached to the entire lower surface of the adhesive layers. As shown in figures 1 and 2, the adhesive and the protective covers are alternately placed to provide for manual peeling of a single layer at a time to expose a fresh adhesive surface (abstract).

Although not expressly stated, Steer does teach that the adhesive layers are of different and decreasing strengths, in a direction away from the backing, because peeling of one layer at a time would provide for the other layers to stay in-place by its adhesive characteristics. Similarly, the protective covers would provide for different and decreasing peel strengths, in a direction away from the backing, because the peeling of the cover layers are conducted one at a time without peeling the other cover layers.

Figures 1 and 2 shows that the plural cover layers are provided with at least one tab (36) to facilitate its removal. Figures 5 and 6 shows that the tab of subsequent cover layers extend beyond the previous one to facilitate grasping said tab.

The tabs are provided with numerals or other invisible indication to assist the user. The indication means would include color-coding.

The intended use phrase such as "for direct skin attachment" has not been given patentable weight because said phrase is not found to be of positive limitation.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

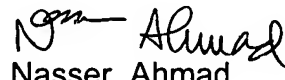

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
